

How to Perform Maintenance Update's

- Make sure the computer is up to date on Microsoft Windows Updates
- Make sure the computer is up to date on anti-virus software

The Following programs should already be installed on your computer. (If they are not see "PC Tune Up for Windows" article our website at www.italleypllc.com/support).

- Malwarebytes – www.malwarebytes.com
- SuperAntiSpyware – www.superantispyware.com
- CCleaner - <http://www.piriform.com/ccleaner/download>
- Defraggler - <http://www.piriform.com/defraggler/download>

 SuperAntiSpyware Run bi-monthly	<ul style="list-style-type: none"> • Launch SuperAntiSpyware icon. • Select Check for updates. • When the update is done the box will say "SuperAntiSpyware has downloaded and installed new spyware/adware definitions" – select close. • Select Scan your Computer • Make sure to check all hard drives – Select Next and the scan will start. • If no spyware is found – select close • When done the SuperAntiSpyware Scan Summary screen displays with the number of detections – select ok • Select Next – items are quarantined and removed – select Ok • Select Finish • Select Close
 Malwarebytes Run bi-monthly	<ul style="list-style-type: none"> • Launch Malwarebytes icon. • Select the Update Tab. • Select Check for Updates. • When the database is updated the windows will say "The database was successfully updated from version ____ to version ____." – Select Ok. • Select the Scanner Tab. • Perform quick scan should be checked • Select Scan. • If not malware is found a .txt notepad screen notifies you of no infections – close this window • If the screen show's you have malware, follow

	<p>the prompts to remove.</p> <ul style="list-style-type: none"> • Exit program
 <p>CCleaner Run bi-monthly</p>	<ul style="list-style-type: none"> • Launch CCleaner icon. • (If a new version of software is available you will be prompted to go the developer - Piriform's website. – Follow the instruction for upgrading). • Select Analyze. • Select Run Cleaner. • "This process will permanently remove files from your system" – select Ok. • CCleaner will close when it's done.
 <p>Defraggler Run monthly</p>	<ul style="list-style-type: none"> • Launch Defraggler icon. • Select Analyze. • Select Defrag (this can take several hours, run at night/after hours). • Defrag Complete when done – select OK. • Close Defraggler.
